About Company

Each nostalgic piece has its own history, which is derived from her childhood memories. She is truly inspired by the women in her life, especially from her mother, grandmother and aunt. Therefore we usually find collections that are named by their reflections. Inspired by the refined taste of her aunt, one of the descendants of Ottoman dynasty, she combines the classical and contemporary in her graceful designs and presents each jewelry elegantly.

Each piece is crafted - the process of executed techniques combined with the details of designs and elements of the beauty - by the skilled artisans in the heart of Grand Bazaar.

Be for B handmade jewelry is the harmony of style, elegance, sophistication and timelessness.

About Company

Bize creations are all about contemporary woman's independence of thought and creative power, defying time but never losing vulnerability, making her smile with unusual cuts and astonishing details, avoiding mundane with a poetic approach. Being cynical about fashion and its homogenizing world. Loving own body and greeting it with sparkles everytime a new season comes. Raising all the emotions as raising the collar of a shirt. We would like to point out that the team sometimes hug each other with excitement while creating these pieces you love. What is enough to describe this passion of ours. Neither spring, nor hot summer, nor flaky snow can describe this..Always dress with pleasure and love..To everyone who reaches and suits us..

About Company

Fifty pieces was founded with the aim of creating timeless pieces that can be worn for years. With a minimalist and environmentally friendly approach, resisting fast and excessive consumption, it aimed for a high quality and long-lasting production. It combined must-have basics with special designs. Everything started with fifty pieces, and actually fifty pieces were enough for every wardrobe.

~

In our opinion, the fascinating part of the word 'fifty' is that everyone can find a piece of it in themselves. It is the number that symbolizes life itself. Nothing in life is one hundred percent, but 'fifty'; is the mid-way, enough and perfect as it is. Fifty in some kind, isn't whole, so it never stops exploring and learning. It is free, adventurous and curious. In numerology, "fifty" refers to the angel number. It symbolises the fusion between body and soul, mind and spirit.

About Company

İKİKİZ is a Turkish sustainable resortwear brand that designs effortless timeless looks for conscious-minded people. The story began in the Aegean Region, one of the places where nature is most generous to humanity. We admire the simplicity of nature and try to reflect our passion and excitement to our products.

We believe that each body is unique like the parts of nature. That is why we strive for everyone to embrace their 'uniqueness', accept themselves as they are, and believe that imperfect is the new perfect. You will find products like yourself rather than trendy ones in İKİKİZ. Simple, unhurried and keeping its word against nature...

We know that protecting nature means protecting ourselves. Therefore, our biggest inspiration is to establish our main philosophy by adopting it the sustainability movement, ethical and slow fashion understanding.
