

GENERAL INFORMATION

1. Introduction

The Halal Science Center Chulalongkorn University (HSC-CU) in collaboration with the Central Islamic Council of Thailand (CICOT) and the Halal Standard Institute of Thailand (HSIT) will host the 5th Thailand Halal Assembly 2018 (THA2018) between 14-16 December, 2018 at the Bangkok International Trade and Exhibition Center (BITEC) in Bangkok, Thailand. Since its inception in December, 2014, the Thailand Halal Assembly (THA) has received overwhelming support from both the public and private sectors and several Islamic organizations.

The Thailand Halal Assembly is an exposition displaying a great variety of certified Halal products and services of Thailand, aiming to exhibit the advancement of the country’s Halalization in line with the Thailand National Strategy. Within the guiding principle of ‘Religion Certifies – Halal Science Supports’, Thailand’s Halal products and services have received worldwide recognition.

Incorporating two crucial approaches this year, THA2018’s main theme is “Precision Halalization in the Bioeconomy Era”. Agriculture has always been Thailand’s strength, and hence ‘Bioeconomy’ should play an important role in the country’s future economic system, integrating technologies which respect environment and cultural differences, applying precision farming, and bettering human and animal food production from renewable biological resources. ‘Precision Halalization’ on the other hand, focuses on the integration of Halalization into standardization, science, technology, and innovation. The success of the Thailand Halal Assembly will lead the country into the Bioeconomy era, eventually moving the country towards the concept of “Efficient and Sufficient Thailand.”

THA2018 encompasses two important events: the 11th Halal Science, Industry and Business International Conference 2018 (11th HASIB 2018) and Thailand International Halal Expo 2018 (TIHEX). Both events include both Thai and international entrepreneur meetings, international conferences on Halal accreditation from global Halal accreditation bodies, business globalization, relevant exhibitions, and academic presentations in Halal Science.
